From Lotus Notes to Microsoft 365

About our Workshops

Altitude 365 | We have developed a variety of workshops, all of which aim to support your digitalization journey in an inspiring and efficient way.

If you do not find what you are looking for, you can always contact us for a customized experience!

Are you planning a transition from Lotus Notes to Microsoft 365?

If you work in an environment based on Lotus Notes and Domino, you have probably received the question from the business if you can switch to a Microsoft-based system instead. Many organizations believe it is difficult and complicated to carry out data migration, but with the right tools and knowledge it becomes easy.

During this workshop, you will see how a migration project is working and what challenges you are facing. Unlike when the migration tools manufacturers talk to you, you will learn both what works and, above all, what will not work during a migration. During the workshop we will review the following:

- Basic conditions.
- Data migration.
- Co-existence - basic.
- Co-existence - advanced.
- What works and what will not work.
- What can be migrated and what can not be migrated.

Suitable receiver

This workshop addresses to IT managers and technicians, especially Domino administrators.

What do you get?

The purpose is for you to get an understanding of what a migration project entails. We review the steps that need to be taken, which gives you a good idea of what it will cost.

Time & place

The workshop takes place at your location and is a day which is divided into two passes. The morning pass is very visionary and we focus on inspiring and lifting opportunities. The afternoon pass concretes the morning to turn into actual plans and clear actions.
