# Digitization in practice

## About our Workshops

**Altitude 365** | We have developed a variety of workshops, all of which aim to support your digitalization journey in an inspiring and efficient way.

If you do not find what you are looking for, you can always contact us for a customized experience!

## Simplify the digitization journey & identify "low hanging fruits"!

There is a lot of talk about digitization, but not as much how to proceed from a practical standpoint. Perhaps you are in Office 365 or are considering moving up to the cloud. In any case there are great benefits to download directly in the Office 365 platform.

Theory is varied with practical examples that demonstrate the powerful tools available already today. The workshop will among other include:

- What does the concept of Digitization mean?
- Microsoft Flow, Microsoft PowerApps, and Azure Logic Apps
- Triggers and actions
- Integrations
- Security in digital processes

## Suitable receiver

This Workshop is suited for Power users, such as champions if you have a champion-program and staff at the IT department.

## What do you get?

The purpose of the Workshop is to create an understanding of the breadth and width of the Office 365 services that can help you simplify and digitize your processes. After completion of the Workshop you will get an understanding of how digitalization work can be simplified using the services provided in Microsoft Cloud Platform. We also identifies "low-hanging fruits" which could be your starting point.

## Time & place

Total time is one day which will take place at your office or over Skype / Teams, though this Workshop is often the most effective if carried out at your place.
